

# **11 Risk Management - Tailoring**

## Tailoring

- **Project size** - budget, scope, team size → is more advanced risk mgmt necessary?
- **Project complexity** - high level of innovation, new technology, commercial arrangement, interfaces, external dependencies → is more advanced risk mgmt necessary?
- **Project importance** - has the project strategic importance for the organization?
- **Development approach** -
  - Waterfall? → sequential or iterative approach for risk mgmt activities?
  - Agile? → address risk at start of each iteration and during execution
